Klamath Basin Area Office Project

Ruby Pipeline Crosses the Lost River

Project Status and Photos for the month of February

Photo 1: A section of pipe 360 feet long and 42 inches in circumference is lifted in preparation of placement. The pipe is designed to span the Lost River on the Klamath Project. The natural gas pipeline will carry the fuel from Wyoming to Oregon.

Photo 2: The section of pipe is placed in a trench across the river and backhoes begin the process of fitting the pipe.

Photo 3: Construction crews work to cover the pipe and complete the crossing.
